Our services

Relative effectiveness of courses/curriculum plan

Our experience in the sector and access to other partners allows us to calculate and provide a variety of internal measures compared against sector benchmarks for efficiency. A detailed analysis of existing course income and delivery costs provides a framework with recommendations for improvements, including forecasts of potential savings.

Health check

We provide consultancy and guidance in optimising curriculum delivery methods and overall performance. A matrix analysis of individual measures of course and programme efficiency mapped against key performance indicators will provide the basis for action planning.

Curriculum planning

A curriculum plan is out of date as soon as it is published, but it does enable you to get to where you want to be. Our consultancy will enable you to pre-empt changing and emerging guidance, through careful and detailed scrutiny of existing curriculum offer with suggestions for enhancement.

Advice on funding

Our sector experience gained through delivering consultancy and full MIS managed services for many learning providers gives you the opportunity to access advice on funding issues relevant to your organisation's planning cycle.

Curriculum planning and funding awareness

Many providers fail to maximise their Learning and Skills Council income because staff do not have the relevant level of knowledge about funding issues and emerging guidance. We can provide funding training to a variety of audiences in your organisation.
