

Laings Houses are designed by competent Architects

MALVERN 'K' HOUSE

Solidity, simplicity, convenience and refinement characterise the Laings Malvern House, designed by Arthur W. Kenyon, F.R.I.B.A. Very pleasing and satisfying is the note of restrained modernity combined with comfort which is evident throughout. This house is one of the attractions at the Ideal Home Exhibition at Olympia.

Laing houses are attractively designed by competent architects upon sensible labour-saving lines with a view to a maximum of comfort and convenience and minimum of maintenance costs.

CORONATION HOUSE

This beautiful house has been specially designed by our Architects to mark the Coronation year. The elevation is greatly enhanced by the interesting tower bay and portico. The interior impresses one by its spaciousness and original planning. There are many novel and useful features.

THE CHALET TYPE

This well planned and charming Chalet will particularly appeal to those who require more accommodation on the ground floor. Everything is compact and designed to save labour and one of the bedrooms, the bathroom and a separate W.C. are on the ground floor.
