

Kologarn

Everyone

Do not run over the edge!

Keep out of **Focused Eyebeam** by stepping away from it.

Main Tank

Tank him face on in the middle.

Be prepared to use all damage reduction cooldowns when debuffs stack up.

If killed, announce to the Off-Tank to him pick up immediately.

Off Tank

Focus on the right arm if up, otherwise focus on Kologarn.

When the arm dies, be prepared to pick up the group of adds that spawn.

Watch the Main Tank's status. You will need to cover him if he dies.

Healers

The tank will be constantly receiving large amounts of damage and needs focused healing.

The raid should need little healing, allowing primary focus on the tank.

When a player is affected by **Stone Grip**, they must receive healing to keep them alive.

DPS

The right arm should be the main focus while up, and Kologarn should be while down.

When a player is affected by **Stone Grip** maximum damage output is needed on the arm.

Melee

Kologarn is the primary target. Adds should be ignored unless you can help AoE them down.

Ranged

When adds spawn, use all AoE to bring them down as quickly as possible.
