LARGE JIB	60 sq.ft.	60 sq.ft.
Weight approx.	800 lbs.	500 lbs.
Berth	4	-
Designed by:	Peter Milne	Peter Milne

### MARINER

A trailerable four berth cruising yacht designed by Peter Milne which can be towed behind the average family car. Light enough to be launched and recovered by two with ease allowing new waters to be explored on every voyage.

The deep cockpit seats six in comfort and the lifting 150 lb centre plate makes the boat self righting.

Compare these Skipper Mariner advantages with all other small cruisers.

- 1 7 ft. beam gives keelboat cabin spaciousness with four 6 ft. berths.
- 2 Deepsided cockpit for in-the-boat seating. Takes six.
- 3 Shallow draft hull (floats in 12" of water) makes Skipper Mariner an up to the knees, and not an up to the neck, launching operation.
- 4 Self righting with centre plate down, her beamy hull has great stability. Internal buoyancy compartments, foam-filled, make even this cruising Skipper virtually unsinkable.
- 5 Optional safety glass forward cabin window opens for ventilation and is the bow exit hatch to her generous foredeck area.
- 6 Optional transom outboard engine lifting/lowering bracket available takes up to 10 hp. Engine stows in front of transom.
- 7 Priced at a direct-from-the-factory cost (no middle man) and sold only through our own Skipper Boat Centres.
- 8 Peter Milne's design gives performance with stability.

PRICE £595.00 including sails

## SKIPPER MATE

The Dayboat version of the Mariner offering cockpit space for 8 and a forward cuddy as a shelter from the elements. The cuddy can be adapted to sleep two adults and a child in comfort, and has full sitting headroom.

An optional PVC tonneau is available to blank off the cuddy rear opening providing privacy if the optional Porta Potti chemical toilet is fitted. Optional aluminium framed, tinted perspex side windows are available. Whilst the Skipper Mate is easily trailed and can be launched like a dinghy, it provides very much more cockpit and storage space than any other daysailer. Compare these advantages.

- 1 Full width stern locker stores a large volume of gear including an outboard engine.
- 2 Stern engine well takes up to 9½ hp outboard.
- 3 Peter Milne design gives racing performance.
- 4 Self righting with centreplate down and internal foam filled buoyancy compartments make even this big Skipper virtually unsinkable.
- 5 Split level cockpit floor for in-the-boat seating at the stern. Raised floor forward provides a safe area for children and there is storage under.
- 6 Lifting tiller enables helmsman to steer in a standing position for perfect visibility in an anchorage.
- 7 Optional forward hatch gives very forward access and enables foredeck work to be easily executed if Skipper Mate is to be left at anchor on a mooring. Excellent for cuddy ventilation.
- 8 Priced at little more than the average dinghy and available through Skipper Boat Centres.

PRICE £495.00 including sails
