

GBTEN Information sheet for the 4K Snooker. File Ref:Snooker\_info\_#206

-----  
 CONGRATULATIONS! At 4,000 points you are now entering the next part of the Programme..THE 4K CHALLENGE GAME OF SNOOKER!.. Details as follows.

- 1) Work 36 GBTEN Members. Record details on the worksheet provided.
- 2) Enter stations when found. But, you may only enter the final 6 places when all other sections have been completed.
- 3) Two free balls (FB on basic) + two Wild Cards (WC on Basic) may be used. You may use Free Balls to your advantage but not in the final six places marked with the six colours Yellow to Black.
- 4) No retro contacts please, your start date is shown on worksheet.
- 5) New Update Info: There is one GBTEN member with a Certificate dated the 01/01/01 (1st January 2001) If found, you may use it as 3 contacts in the Red Ball section where you need to find contacts worth 1 point each.

#### How To Find the Correct Stations.

-----  
 Assume that all GBTEN members have a three digit membership number

-----  
 ie: #1 = 001; #10 = 010 and #91 = 091 etc. Then, add any two of the three together for a value of between 1 and 7. This value is used to determine the point value for that station and if it will fit in correctly.

An example entry could read as follows -:

-----  
 Colour : Black : GBTEN Number 708: 7 points : Stn Worked M4ABC :  
 Colour : Pink : GBTEN Number 601: 6 points : Stn Worked M4AAA :

Examples of these values are as below.

-----  
 Those with a value of 1 are equal to a Red ball worth 1 pts...ie: # 301.  
 Those with a value of 2 are equal to a Yellow ball worth 2 pts..ie: # 302.  
 Those with a value of 3 are equal to a Green ball worth 3 pts..ie: # 302.  
 Those with a value of 4 are equal to a Brown ball worth 4 pts..ie: # 301.  
 Those with a value of 5 are equal to a Blue ball worth 5 pts...ie: # 302.  
 Those with a value of 6 are equal to a Pink ball worth 6 pts...ie: # 303.  
 Those with a value of 7 are equal to a Black ball worth 7 pts..ie: # 304.

As you will see, there are several combinations possible on most of the membership numbers. It Is Up To You To provide The Correct Information

as required on the worksheet! You must indicate the colour used and the Station details on the enclosed worksheet in the spaces provided.

A maximum of 147 points for a correct entry. The minimum is set only by the point values of the stations you decide to enter on the worksheet!

Thanking you for taking part in this section of the programme.

Have fun whilst enjoying 10 Mts.....73 de Dave.....

This issue is dated the 16/01/2004 and supersedes all other published
